Subject: Presentation To Panel on Potential Revisions to Program Areas

At the end of the May Panel Meeting, we will give a short presentation to Panel. Below is a summary of the presentation topic.

In an effort to simplify and streamline various areas of the ETP program and processes, staff/stakeholders have been reviewing and brainstorming ideas for potential revisions to the following seven areas: Health Care Benefits, Substantial Contribution, Funding Priorities, Wages, Reimbursement Rates, Non-Traditional Apprenticeships, and Delegation Order.

The Panel Presentation will go over each of these items, outlining what our Legislation and Regulations allow, what our current practices are, and what some potential revisions may be.

There will be time at the end of the presentation for questions and comments from Panel and the public.
